

Download the eXpress Software / open Customer Account

the eXpress installer (Trial for 30 days) from www.intelec.eu and start the application (Wnet32.exe or Wnet64.exe / Wcad32.exe) on your pc (Single user) or on your server (Network license) to retrieve the correct :

Hardware ID :

Every eXpress License is locked to the Hardware ID of a single computer (server) and therefore it is important to start the application on the computer where the eXpress Software will be activated. For multiple users we advice to use a Network License, which will be locked to the server hardware : (remote login and) start the application on the server (not over the network), to retrieve the correct Hardware ID (read note 3 on the last page). **Note** : the 64 bit version does not support 32 bit clients !

Startup dialog eXpress (Trial)

Press **BUY NOW** or open Account to open or create an INTELEC customer Account and post the Hardware ID :

INTELEC Customer Account Registration / Login

License

Network license # number of users (0=Single user) ? →

Standard license (does not expire)

Temporary license # number of weeks: ?

Telplan license # number of calculations: ?

Orderpage

If you want to use the **NEN-1010** (the Dutch IEC-60364) then activate button **Dutch** (multi-language version). For 1 language the discount is 50% (except Dutch). For every extra language 10% extra is charged.

If you want to use the Single user version fill in **0 (zero)** at the **red** arrow. For Network Licenses you need to enter a value between 1 and 255 = the maximal number of users simultaneously on 1 Network server. **Note** : the 64 bit version does not support 32 bit clients !

Optional you can also BUY Temporary Licenses for a number of weeks or number of calculations (not for IS-CAD).

Note 3 : Telplan is only available as Single user. Open the help Topic : [Temporary eXpress Licenses](#) in the application for more details.

The price for every extra license (user) in a Network version is only **10%**. The price for a Temporary

license is 10% for every week. The price for a Telplan license is 1,- Euro for every calculation and the minimal order is 25,- Euro.

Account Settings

Click on [print invoice](#) to print the (lastest) invoice for your License, which contains the following note :

We will send you the **Registration Email** to activate your License after the payment; this Email contains all details for activating the License; here follows a summary (including the Enter Key dialog) :

Activating eXpress Licenses :

Execute the eXpress Installer : INTELEC_20xx_eXpress.exe (20xx is the Version) and select the program-path and press 'INSTALL'. After the installation press button 'Registration' and choose the program, the type of License and select one of the commands :

- for a **Single user** License : select '**Wnet32 REGISTER**' and press EXECUTE for activating the License.

- for a **Network** License : select '**Wnet32 SERVER REGISTER**' and press EXECUTE for activating the License.

The '**Enter Key**' dialog will appear : enter your License Name and Key and press **Activate License** :

INTELEC cable-calculations according to **IEC 60364**

- calculation module IEC 60364 LTE from 140,- Euro
- standard databases: protections, cables, busbars...
- integrated CAD + video instructions
- maintenance contracts + Email support
- workshops and trainings + E-learning

NTON INTELEC Power Engineering version 5.3P

Copy and paste the License Name and License Key from the Registration Email and press Activate :

Hardware ID : 854E-C916 Version : 2011.00

Name INTELEC Software Europe

Key 2GKH66-ZT33GX-N7MD8R-B824HF-.....

→ Activate License Cancel Account post Uninstall Code

Account : open (new) Account to order or renew Licenses
post Uninstall Code : open Account to post the new Hardware ID and Uninstall Code (after Unregister)

Enter Key dialog

Important : the License type (Network or Single user), the **Hardware ID**, the **Version** (year), the entered **Name** and **Key** have to match exactly to activate the License : the message 'key is valid and has been stored' should appear. You must also use the same version for registering (32-bit and 64-bit cannot be mixed). In other cases read the extended Help (topic Registration) about the Hardware ID, Version, Unregister etc !

In case of problems send an Email and attach a copy of the 'Enter Key dialog' to : intelec@intelec.eu

Important : this is the **only way** to activate **Network** Licenses ! Only Single user Licenses can be activated from the applications Trial dialog (button Registration) :

Registration dialog (open the applications menu [Help](#))

Server IP ->

modules ISC N:0000-FF0F Help Renew Account OK

All the details can be found in the Registration Email and also in the Help topic : **Registration** :

Press the  button for extended **HELP**, where more details can be found about i.e. :

Hardware ID and UNREGISTER

The hardware ID depends on you hardware configuration and therefore it is necessary to **UNREGISTER** the License Key **BEFORE** you change your hardware or move the License to another computer or if you want to migrate from the 32 to the 64 bit version ! UNREGISTER will permanently REMOVE the Licenses and change the Hardware ID on the target computer for that License ! Be careful to **NEVER UNREGISTER before** you REGISTER (activate) the new (year) License : if you UNREGISTER first then the new (year) License cannot be activated, because the Hardware ID's do not match and you need to order a new License ! Read the extended UNREGISTER instructions in the Help or press [Instructions](#) in your account !

Extending your License(s) (edit order / Renew)

In your [Account](#) press **edit order** (under the License ID) or press button **Renew** (in the Registration dialog above) to upgrade your existing License with another License Name, a newer version or extend the modules or the number of Network users. In your account settings you can also choose to set **Autorenew** (yes) for upgrading your License(s) every new year; you will receive an Email in january and after the payment you will receive a new Registration Email to activate the license for the latest version.

Network License subjects :

After a successful activation you need to start the Network eXpress Server : [execute the eXpress Installer](#) and press button Registration and select 'Install INTELEC Service' and 'Start INTELEC Service' or select 'Wnet32 SERVERX'; the clients can be started with a shortcut to Wnet32.exe.

[Working with the Windows firewall](#) (read the Help)

[Wnet32.ini / Wcad32.ini](#) (read the Help) :

You need to specify the IP address (in the **ini**-file), in case the application cannot automatically locate the server using UDP broadcasts; you can also try to raise the Timeout value (default 3 seconds).

[Starting the eXpress Network Server and CLIENTS](#) (read the Help)

[Windows Service](#) (read the Help)

Note 3 : you need to start 'Wnet32 REGISTER' (single user) or 'Wnet32 SERVER REGISTER' (network) to obtain the **correct** Hardware ID (after unregistering) If you start 'Wnet32.exe' you can only obtain the single user Hardware ID !

Note 4 : if you want to use the **64** bit versions of the applications replace all Wnet**32** occurrences with Wnet**64**
